Languages

Hungarian (native)

English (intermediate)

Studies

Eötvös József KSZKI (Secondary school of economics).

Graduation, Computer programmer-certificated accountant

Main abilities and knowledge

Web related software

MySQL, SQL Server, Oracle, PostgreSQL, Apache (maintenance, virtual hosts, rewrites), PHP, MySQL, SVN, Memcached, Redis, Photoshop (intermediate level), Paint Shop Pro (intermediate level).

Programming- and mark-up languages

PHP4 and 5, SQL, JavaScript (native, YUI, Prototype, ExtJS, jQuery), (X)FBML, FBJS, (X)HTML, JSON, XML, CSS2-3, Smarty, RegExp, JSP.

Special knowledge

Micropayment experience (PayPal, Credit card, SMS), High traffic, high loaded systems, Facebook API, Agile Development Process, Scrum, i18n and i10n experience, Adobe AIR.

Other skills

Team leading and project management experience, creating and handling documentation, Microsoft Office, Open Office, Microsoft Project, drivers' license (Hungarian category „B” – owner-driver).

Hobbies and spare time activity

In my spare time I work on a Javascript Game Framework and a Wild West themed social network game. I am interested in new technologies. I usually visit the meetups in Budapest (New Technology, Budapest.js).

Science fiction and fantasy are my all time favorite genres (books, games and movies).

I really love to play and to make all kind of games; I read books about making experiences, game design and developing (all kind of games: role-playing, card games, board- and computer games).

Experience

EPAM Systems (IT) – Senior UI Developer

10. 2010 – present (Budapest, Hungary)

<http://hotels.com/>

I work on the UI of the Hotels.com website. I create the final look and feel and develop the Javascript parts of the website according to the wireframes and the mockups.

Usually I work on a Partner Tools subsite, where the partners can create widgets for their sites, for example banners, lists, feeds, deal lists and customized search form with different colours and functionality. I created the first JS-intensive search form generator, the fields are movable and resizable by mouse.

In the top of that I have to work on the mobile field too with HTML5 and CSS3 with strong JS support. I work with the following technologies: JSP, CSS2, CSS3, XHTML, HTML5, Javascript, JQuery, XML.

I contact with English speakers on daily basis over Skype (written and spoken).

We use Agile (Scrum) project management methodology.

Inda-Labs Zrt (media) – project leader/web software engineer

05. 2007 – present (Budapest, Hungary)

<http://indapass.hu/>

I am project leader and software designer. I work on the Indapass, which is the largest Hungarian SSO system. As developer (PHP5, JavaScript – ExtJS, MySQL) I work on the administration board of the Indapass and some particular problem. Approximately, I am PM and Developer in 50-50%.

Indapass is a single sign-on system, serving the authentication and authorization to the following sites: Indamail.hu (free email provider), Blog.hu (the largest free blog provider in Hungary), Indafoto.hu (photo sharing) and the Indavideo.hu (video sharing). The Indapass, and the enumerated sites belong to [Index.hu](http://index.hu), the second most visited news portal in Hungary.

Vatera.hu Kft (e-business) – developer

11. 2006 – 05. 2007 (Budapest, Hungary)

<http://vatera.hu/>

I worked on the most popular auction website (and co-branded versions) in Hungary (PHP5, XHTML, Javascript, Oracle).

Jasmin Media Group (adult entertainment) – developer

11. 2005 – 11. 2006 (Budapest, Hungary)

<http://livejasmin.com/>

I worked on the livejasmin.com (PHP5, MSSQL, Javascript). I had firsthand experience with systems with high traffic and high availability requirements. The profile of this site is adult entertainment, rated 42nd on the Alexa (worldwide) and 24th in the US.

Expressz Magyarország Zrt. (advertisement) – lead developer

11. 2004 – 11. 2005 (Budapest, Hungary)

<http://expressz.hu/>

Expressz is the eldest classified advertisement newspaper in Hungary. I worked on the Expressz Online (PHP4, PostgreSQL, Javascript). I led a small team, a DBA and two other developers.

Webconsult.hu Kft. (web agency) – developer

11. 2003 – 11. 2004 (Budapest, Hungary)

<http://webconsult.hu/>

I worked on various projects; include the CMS of the company, named Calcun. Developed websites and applications for council of Szentendre, Panasonic Hungary, for the Szerencsejáték Rt (state-owned gambling company) and various clients including administration. Experienced in PHP4, MySQL, MS SQL and Javascript.
